# QUALITY POLICY

Valmet Plating S.r.l. has for a long time been a leading player in the market for processing metal surfaces in the Decorative and Fashion Accessories sector, designing, producing and marketing galvanic processes for basic treatments in Nickel, Copper and Bronze, and finishes with precious alloys based on Gold, Silver, Palladium, Platinum, Rhodium and Ruthenium, along with Cataphoresis products. The Company Directors and Owners believe Quality Management is the determining element for creating galvanised products with plating that's characterised by a high degree of chemical and mechanical resistance, a brightness and uniformity that is stable over time and ensures market approval.

To achieve and maintain a high standard of quality, the Company, as well as complying with current legislation, has established a suitable and appropriate Quality Management System that is continuously maintained, reviewed and improved, and is committed to ensuring compliance with the requirements of UNI EN ISO 9001: 2015.

Against this backdrop:

- The QMS is the formal reference framework, whose objectives are the excellence of Valmet Plating S.r.l. products, attention to detail and customer satisfaction.
- Valmet Plating S.r.l. promotes the systematic use of working methods that aim to satisfy customers by clearly identifying the requirements and applying Risk Assessment and PDCA (Plan Do Check Act) logic to all company processes, which allows it to supply highly customised galvanic processes that are difficult to replicate and ensures the conformity and uniqueness of items that are manufactured with our products.
- Valmet Plating S.r.l. guarantees high standards when managing galvanic processes by direct contact between the business department and customer, and offering a highly skilled continuous control service, which is achieved via analyses at its own in-house laboratory, the flagship of the facility, which can boast a highly skilled workforce - all of whom have many years' experience in the sector, and by following up on all stages in the development of innovative, customised processes.
- Valmet Plating S.r.l.'s Owner supports continuous improvement in its QMS and its own processes by investing in the research and development of new products and processes, as well as by setting up partnerships with University Research Institutes and continuously monitoring the satisfaction of all of the parties involved.
